

# What About Rehab?

While there are no hard and set rules or even “best practices” available to us, here are a few things to consider:

- Review the care plan interventions and set goals; are services necessary?
- Use consistent assignment of therapists
- Discontinue group and concurrent services
- Prioritize the cleaning/disinfecting/sanitizing of equipment
- Avoid therapists traveling between communities to provide care
- Follow facility policy regarding screening upon entering the center
- Require use of appropriate PPE

➔ Care plan should be updated when resident conditions change

➔ Involve the Medical Director in risk/benefit analysis

➔ Individual services should be performed in resident rooms while maintaining social distancing

➔ Document each time equipment is cleaned/disinfected/sanitized

➔ Dedicated therapy staff should be assigned to each community

➔ Ensure mandatory masking, social distancing and hand hygiene
